

Front-end Project Details

In this project you will be required to work on the front-end part , specifically :

1. Displaying all products . As you will create a homepage where all products will be showcased . Each product will have its details displayed such as name , description , price and any other relevant information
2. Adding to cart . As you will include a functionality that allows users to add products to their cart .This feature will enable users to easily save their preferred products for future reference .
3. Login Functionality . As you will implement a login feature that allows users to sign in with their credentials . As it will provide a personalised experience and enable users to access additional features

The reference UI template will be as [shopwise project](#) and for API's you will be able to use this [API](#) to assist you in achieving the required objectives.

Code Evaluation Criteria :

1. APIs
 1. API to get all products 10deg
 2. API to get single product details 10deg
 3. Login functionality 10deg
 4. Add to cart functionality 10deg
2. Using Framework (React , Angular ,Vue) 15deg
